BeautifulSoup(html_doc, "html.parser", parse_only=only_short_strings)
```

heemayl commented on Apr 19, 2018

`soup.select('a[href^="http://example.com/"]') # negative match` is *incorrect*; `^` matches the start of the attribute value string (like Regex). So, it should read:

```
soup.select('a[href^="http://example.com/"]')  # start match
```
